

Easy1

I just download the file and I saw that it was vigenere cipher

Then I used the key and the table

The one time pad can be cryptographically secure, but not when you know the key. Can you solve this? We've given you the encrypted flag, key, and a table to help **UFJKXQZQUNB** with the key of **SOLVECRYPTO**. Can you use this **table** to solve it?.

It was >FUN<
